SMART

I sistemi di riparazione veloce con ventose e colla a caldo, consentono di lavorare direttamente su superfici verniciate e quindi evitare di sverniciare e ri-verniciare la vettura. Con le piccole ventose, disponibili in diversi diametri e profili, è possibile riparare piccole ammaccature come bolli da grandine su tettucci, cofani e portiere. Grazie alle nuove e brevettate ventose multiple™ MWM, è possibile invece riparare o comunque ridurre le ammaccature di medie e grandi dimensioni.

The MWM's fast repair systems with suction cups and hot glue allow you to work directly on painted surfaces and to avoid flaking and repainting the car. With small suction cups, available in different diameters and shapes, you can repair small dents from hail marks on roofs, hoods and doors. Thanks to new, patented MWM's multipads, you can even reduce or repair the dents of medium and large dimensions.

VENTOSE MULTIPLE MULTIPADS

Esempio di utilizzo su sottoporta

Example of usage

1 - PREPARAZIONE • PREPARATION

Pulire la zona con un prodotto sgrassante.

Clean carefully the surface, removing oil and grease remains.

2 - INCOLLAGGIO • BONDING

Applicare sulla ventosa una sufficiente quantità di colla calda.

Apply a small quantity of hot glue on the multipad's surface.

3 - FISSAGGIO VENTOSE SU LAMIERA • MOUNTING MULTIPAD ON PLATE

Fissare la ventosa sulla superficie della carrozzeria.

Fix the pads on the sheet surface.

4 - TIRO • PULL

Tirare la lamiera. Esempio di utilizzo con traversa di tiro MWM.

Pull the sheet-surface using the MWM's Pulling Bar.

Tirare la lamiera. Esempio di utilizzo con martello estrattore.

Pull the sheet-surface, using a slidinghammer.

5 - DISTACCO MULTIPADS • MULTIPADS DETACHMENT

Rimuovere le ventose, usando lo speciale Glue Removal MWM.

Remove the multipads by using the MWM's special Glue Removal.

6 - RITOCO • TOUCH-UP

Risultato finale.

Final result.

QR CODE VIDEO

OctoPULLER

MWM coniuga DESIGN e FUNZIONALITA' con il nuovo prodotto dedicato alla riparazione con ventose.

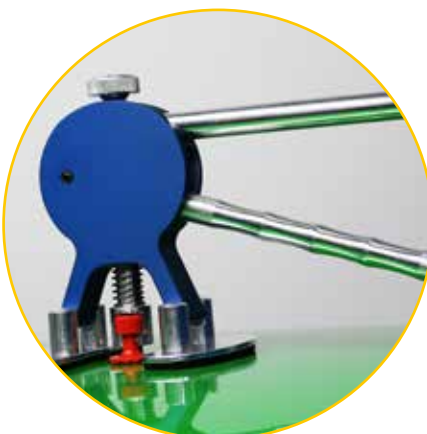

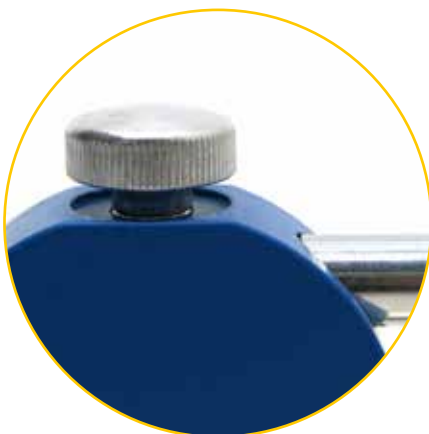

Caratteristiche principali:

- Peso contenuto
- Testina ruotabile a 360°
- Vite superiore per regolazione in altezza
- Basi di appoggio ruotabili con copertura protettiva

MWM combines DESIGN and FUNCTIONALITY with the new product dedicated to the repair with suction cups

Main features:

- Light weight
- Head can be rotated 360°
- Upper screw for height adjustment
- Support bases rotatable with protective cover

VENTOSE AD ALTA TRAZIONE HIGH TRACTION SUCTION CUPS

QR CODE VIDEO

La nuova serie di ventose ad alta trazione arricchisce la linea colla MWM; con una maggiore superficie di contatto tra ventosa e colla, la forza di trazione applicabile prima del distacco viene notevolmente aumentata.

The new range of high traction suction cups enlarges MWM glue product line with a wider contact surface between suction cup and glue so that the applicable traction force before the release is considerably increased.

KIT 20 SUCTION CUPS HIGH GRIP
(5X16/21/26/32)

Disponibili in quattro differenti dimensioni, di 16, 21, 26 e 32 millimetri di diametro e facilmente identificabili dai colori giallo, rosso, blu e grigio, le nuove ventose MWM presentano una superficie di contatto leggermente bombata e sono state rinforzate nella parte di contatto con l'elemento di trazione.

Con le nuove ventose MWM è quindi ora possibile realizzare riparazioni senza sverniciare in punti nei quali prima era impossibile.

Available in four different sizes of 16, 21, 26 and 32 mm diameter and easily identified by yellow, red, blue and gray colours, the new MWM suction cups have a slightly curved contact surface and were toughened in the contact part with the pulling item.

With the new MWM suction cups it is therefore now possible to make repairs without paint removal which beforehand was impossible.
